Milan Murray

Software Developer

Email: m-murray-cv@outlook.ie

Based in Dublin, Ireland

Personal Statement

I am very passionate in regard to technology and programming. To name a few examples, I have experience in the construction and assembly of computer hardware as well as a strong fundamental understanding of computer software. I am confident in my ability to adapt to new working environments and maintain a quality and consistent work ethic as I have experience from studying abroad in Spain.

Currently I am studying the Computer Science with Languages (honours degree) at Technological University Dublin. I am experienced with many coding languages, brainstorming & problem solving as a part of a team or individually. When coding I am diligent in my efforts to create optimised programs following best practices. I enjoy speaking Spanish and only hope to further strengthen my understanding of the language. I wish to pursue a career in the software development field.

In the spring semester of 2022 I took part in an Erasmus mobility in Valencia to continue my studies in Universitat Politècnica de València. I'm extremely grateful for this opportunity as it was a very positive period of personal growth in which I expanded my contacts and was able to undertake new topics in the computing space.

Software Experience

- Git
- VIM
- Visual Studio Code
- Blender
- Godot game engine
- Unity game engine
- Docker
- Oracle VirtualBox
- GNU Image Manipulation Program
- Open Broadcast Software
- Video Editing Software
- LibreOffice Suite & Microsoft Office Suite
- Computer hardware monitoring software
- MongoDB

Programming Experience

- C#
- Python
- C++
- Shell Scripting
- JavaScript
- HTML & CSS
- Java
- SQL

Computer Systems Experience

- Linux & Windows CLI
- Cloud Computing
- Hardware Components
- BIOS Configuration

Education

BA Science in Computing with Languages (Honours) 2023 (EXPECTED)

Previous Education

Leaving Certificate | Ballinteer Community School (BCS) | GRADUATED 2019

Results available upon request.

Professional Experience

Residential Moving Assistant with A–OK MOVERS – 2016 to 2019

Retail Assistant with PENNYS 2016

Programming project with ESERO 2021

Hackathon with TUD and Amazon 2022
